Summary

I am new to many jobs and careers in the white and blue-collar industry/sector. However, I am not a novice with a good work ethic and a dedication to hard work. I do not put in the work and hours because I expect something in the short term. Instead, I put in hours and dedication into what I am doing because I know it will benefit me and whatever I am doing in the long run.

Know that regardless of the job I do, I seek to make that beneficial to both myself and the company - for improvement, efficiency, and satisfaction.

Experience
